MP-X10 DUAL USB MEDIA/MIDI MP3 PLAYER WITH MIXER

The cutting edge Citronic MP-X10 is a media/MIDI MP3 player and mixer specifically designed to become the ultimate all-in-one mobile DJ unit. It can be used in 3 ways eliminating the need to choose between either a PC software and MIDI controller, or the traditional two media players and a mixer set-up. Firstly, the unit can be used as a stand-alone player. Simply plug in a USB flash or hard drive and access the music on either side of the player by the MP3 track and folder search buttons, viewing the ID3 tags on the large VFD display. You can then mix and add effects between each player using the built-in 2 channel mixer. Secondly, the unit can be switched into MIDI mode, which is compatible with many popular DJ software packages. This feature allows you to control your music and the sound set-up with the built-in sound card driver. Finally, the versatile MP-X10 can be used as MIDI controller on one half and stand-alone player and mixer on the other. Simply access a song on your PC and control it using the DJ software, then cue up your next track on the USB storage device and mix across. This unit is easy to transport, quick to set-up and simple to use, making it ideal for mobile DJs.

- 2 x Large VFD displays which can be viewed from wide angles
- Plays MP3 files from either USB on the front or rear ports on either side of the player
- Easy-to-use folder and file search
- MP3/WAV compatible (ID3 tags)
- Instant start (sound is produced immediately when the play button is pressed)
- 3 modes of operation (Vinyl, CD DJ and Auto cue scratch)
- Interactive "AQ-touch" sensitive jog wheel
- Jog wheel pitch bend $\pm 100\%$
- Pitch controlled $\pm 6, 10, 16$ & 100%
- Pitch lock function
- Single and continuous play options
- DSP effects: echo, flanger, filter, scratch and break
-

Power supply	100~240Vac, 50/60Hz
Power consumption	21W
USB version	2.0
Max. number of Folders	999 (max.255 files per folder)
Max. number of files	max. 999
USB/HDD compatible format	FAT 32 (Recommended max 32GB)
3 band EQ	-35dB, +10dB (press for zero)
Frequency response	20Hz - 20kHz
